

On 19th June, organizing sickle cell anemia awareness camp on the occasion of world sickle cell anemia awareness day

Since the establishment of sickle cell anemia Awareness day in 2008 to increase the awareness among sickle cell anemia and the general public by the United nations General Assembly, World Sickle Cell Anemia on June 19, Worldwide to increase public awareness of this deadly disease. Awareness day is celebrated. Organized by the Synergy Sansthan and SBI Foundation in Jhirniya block of Khargone district World Sickle Cell Anemia Awareness day was celebrated under the Darpan project. About 200 people attend the program from village of Jhirniya block in which the children, Youth and adolescents were also involved.

People suffering from the problem of sickle cell anemia in the problem talk about their problems. Meanwhile, a 10 year old girl said that people suffering from this disease have a tradition of applying a fetus by heating the iron in the village, while the person suffering from sickle cell anemia has to undergo a lot of pain. The girl said that when I was 8 years old, I also got the hot water to iron and I felt very sad at that time too. There is a lot of misconception about people with sickle cell anemia in people who need to be aware.

The chief guest in the program, Dr. Hitesh mujalde, Block medical officer Dr. Ratansingh kanas, CEO of Synergy sanstha Mr. Ajay pandit and Jitendra singh tomar, Social activist of Jhirniya joined the program.

During the program, Dr. Hitesh Mujalde explained to all the participants about sickle cell anemia and advised the patients of sickle cell anemia to drinking more water so that blood circulation normally remained in the body. Eat nutritious food in the food and save yourself from infection.

Block Medical officer Dr. Ratan singh Kanas told that the problem related to sickle cell anemia and tribal communities are affected by it and those who are suffering from this disease need to be aware of sickle cell anemia. He said that there is a lot of misconception in the village regarding sickle cell anemia, people still get treatment from Ojha and Baba of the village. If patients with suspected symptoms of sickle cell anemia get immediate blood tests and sickle cell anemia are confirmed, then see the doctor.
